Morning Consult
National Tracking Poll #150302
March 7-10, 2015

Crosstabulation Results

Methodology:

This poll was conducted from March 7-10, 2015, among a national sample of 2311 registered voters with an oversample of senior voters. The interviews were conducted online and the data were weighted to approximate a target sample of registered voters based on age, race/ethnicity, gender, educational attainment, region, annual household income, home ownership status and marital status. Results from the full survey have a margin of error of plus or minus 2 percentage points.

Table EN5: As you may know, a tax credit that encourages investment in wind energy, called the wind production tax credit (PTC), expires this year. Which comes closer to your view, even if neither is exactly right?

Demographic	Some say the production tax credit (PTC) should be renewed because it keeps electricity rates low and encourages development of proven renewable energy projects.		Others say the production tax credit (PTC) should not be renewed because it is a wasteful subsidy that costs the government billions of dollars for unreliable, expensive energy.
