Table H4: As you may know, pharmaceutical companies receive several years of "exclusivity" for new drugs, meaning other companies cannot reproduce that drug and sell it for a lower price (otherwise known as a generic drug). These periods of exclusivity can vary and can last as long as 12 years. This period of exclusivity is aimed at encouraging innovation and helping pharmaceutical companies recover the cost of research and development. Which statement comes closer to your opinion, even if neither is exactly right?

Table H4: As you may know, pharmaceutical companies receive several years of "exclusivity" for new drugs, meaning other companies cannot reproduce that drug and sell it for a lower price (otherwise known as a generic drug). These periods of exclusivity can vary and can last as long as 12 years. This period of exclusivity is aimed at encouraging innovation and helping pharmaceutical companies recover the cost of research and development. Which statement comes closer to your opinion, even if neither is exactly right?

Demographic	Pharmaceutical companies should receive a period of "exclusivity" on new drugs		Pharmaceutical companies should receive a period of "exclusivity" on new drugs, but it should be shorter.
