National Tracking Poll #171112
November 21-25, 2017

Crosstabulation Results

Methodology:

This poll was conducted from November 21-25, 2017, among a national sample of 1994 registered voters. The interviews were conducted online and the data were weighted to approximate a target sample of registered voters based on age, race/ethnicity, gender, educational attainment, and region. Results from the full survey have a margin of error of plus or minus 2 percentage points.

Table POL12: As you may know, the current tax code allows taxpayers to deduct their state and local income taxes from the amount of federal income tax they pay. Knowing this, which of the following comes closest to your view, even if neither is exactly right?

Demographic	The state and local deduction mainly benefits high-income households in high-property tax states. The federal government should not use the tax code to pick winners and losers by making low-income tax states subsidize high-income tax states.		The state and local deduction makes high-income tax payers more willing to support state and local taxes. Ending this deduction would strain state budgets over time by making it harder for states and localities to raise revenues.		Dont Know/No Opinion		Total N

Table POL12: As you may know, the current tax code allows taxpayers to deduct their state and local income taxes from the amount of federal income tax they pay. Knowing this, which of the following comes closest to your view, even if neither is exactly right?

Demographic	The state and local deduction mainly benefits high-income households in high-property tax states. The federal government should not use the tax code to pick winners and losers by making low-income tax states subsidize high-income tax states.		The state and local deduction makes high-income tax payers more willing to support state and local taxes.
